

11. Wildflower Reunion

◆ Early spring brings the joyful return of life, growth and spectacular color to the prairie. When I see my favorite wildflowers again each year, it's almost like a family reunion! Similarly, the speaker in this song greets each species like dear relatives at a family gathering. However, this song contains only 24 wildflowers while the Flint Hills actually boast over 1000 blooming species! (left: White-Eyed Grass)
